Your business gets an opportunity to replace old and power hungry 450watt Mercury Vapour lights, to the new energy efficient 180 watt LED high bay light fittings. We can also help you swap to LED by gearing it neutrally or positively so that you can pay it off over a period of time from the savings you get. Reduce your power bill costs and our carbon footprint by tailoring attractive and viable LED lighting solutions for them. We offer a free sample of the light, and a free demonstration as well
